# Field Update: VTT Photo Requirements Reminder

VTT Photo Requirements Reminder

Hello,

We understand that keeping up with the evolving Viasat Tech Tools (VTT) app can be challenging. We want to remind you of the importance of using VTT to upload the required photos.

1. Use of VTT: All job photos must be uploaded through VTT.

2. Missing Photos: We have noticed that some jobs have no photos added to the gallery. Please make sure to upload all required photos for each job.

3. Photo Requirements: Viasat reviews these photos to identify system reliability concerns and ensure customer expectations are met.

4. VTT Example:

To learn more about how to use the photo uploader and the details expected in each picture, please watch the video on the homepage of the eGuide — https://eguide.field.viasat.com/.

Stay tuned for more updates as we continue to add features to VTT.

Thank you for your cooperation and dedication to providing excellent service.
