

# Tech Bulletin: Business Hotspots outdoor AP configuration issue resolved

## Business Hotspots outdoor AP configuration issue resolved

Hello,

In March, we sent out a tech bulletin informing you of a known issue with the installation of the Outdoor AP used for Business Hotspots, occurring during the configuration process using the Wi-Fi Installer Portal.

Good

news! We have now resolved the issue, and the Ruckus T300 Outdoor AP should now configure automatically through the Wi-Fi Installer Portal. Please access the [Business Hotspots Installation Guide](#) for complete installation

instructions.

Should you have any issues completing the Business Hotspots installation, please contact **Installer Relations at (888) 278-6869 (Option 1 for Hotspots)** for additional support.
