

Tech Bulletin: New Tech Talk video: Find the Flaw

New Tech Talk video: Find the Flaw

Hello,

In this month's Techtalk we're going to try something new!

The team has set up a bad install in the Techtalk lab, and we want you to tell us what's wrong! It could be bad cabling, or could be that we missed a stud. It could be anything or everything, but we want *you* to tell *us*.

FIND THE FLAW

PART 1

Email us the mistakes you find at field.questions@viasat.com. If you get them all, we'll give you a shout out in part II of this series, where we will show you every mistake we made.

So, show us your stuff! Show us why you're the best installer for Viasat!
