

Tech Bulletin: New Training Available for Business Voice and Business Hotspots (Wi-Fi)

New Training Available for Business Voice and Business Hotspots (Wi-Fi)

Hello,

Viasat is releasing two new products for Retailers to sell with Viasat Business Internet service. Starting this week, Business Voice and Business Hotspots are available!

Business Voice can have up to four lines installed, each with a desktop IP phone. Business Hotspots can have up to two Indoor Access Points (APs) and two outdoor APs.

Viasat Business Internet service is required for both, and these services can be installed for new and existing customers.

This is an exciting opportunity to learn more about Viasat's new service offerings and how to professionally install these services. The training is available on [Viasat Discover](#) for certified technicians. Job aids and installation guides can also be found on the [eGuide](#) under *Viasat Business*.

Business Voice and Business Hotspots training are required to complete any Business Internet installation or service call that includes these services on the work order.

Should you have any questions, please ask your distributor.
