Using the NRTC Admin Tool Job Aid

Adr	ninTool
lome	Subscribers Help
10	Welcome to the AdminTool
	If you have any questions, please email <u>ispwebmaster@nrtc.coop</u> or call the Internet Member Support team at 800-214-6782, option 3. NRTC has recorded how-to demos of the most common functions. To view the demos, log into the Operations page of the <u>Internet Business Center</u> .
	Quick Tips:
	 Use the Accounts Tab to locate owner accounts. Use the User Tab to look up information about owners and subscribers. Use the Sites Tab to locate all sites. Use Filters to customize your search.

Summary

This Job Aid covers:

Domain Names and the Admin Tool AdminTool Navigation

AdminTool Search Filters Viewing Subscriber Accounts

This Job Aid supports the NRTC Technician audience.

Domain Names and the Admin Tool

All necessary information to complete an install is located in the AdminTool. The AdminTool provides subscriber information, point and peak coordinates for the Viasat Internet installation, and information to set up the Subscriber's email. Each NRTC member has a domain name that they use to provide the ViaSat services. This domain name is used for

- Accessing the AdminTool used by that NRTC member
- Creating Email user accounts for that NRTC member
- Providing web-based email for that NRTC member
- Accessing the Subscriber Portal

For example, a member with the domain wbmember.com

- The AdminTool URL is https://admin.nrtc.net/us/login.do
- Webmail is available at https://webmail-3104.everyone.net/#/login
- Subscriber Portal URL is http://wbmember.ruralportal.net

AdminTool Navigation

After successfully logging in to the AdminTool, the Technician has access to resources and information. The three main tabs available to the Technician are Home, Subscriber and Help.

- Home information and announcements
- Subscribers work order and subscriber information
- Help assistance with the Admintool

AdminTool Search Filters

The Technician may view individual work orders, or all of the work orders assigned to them. To view individual work orders, use the **Quick Search** field with one of the designated criteria. To view multiple work orders, use one of the **Preset Filters**

- Pending Accounts shows all of the open work orders assigned to the Technician
- Turned Up Accounts shows all of the completed, fully provisioned accounts done by the Technician

Viewing Subscriber Accounts
